

Movie Showtimes User Guide

By: Christine Beighley, Brandon Jett, and Amber Lai Hipp

Welcome to the user guide of the Movie Showtimes application! Here we teach you step by step how to interact with our application in order to find and experience the very best movies available at some point in the near or distant past!

Once you have our application running, you will notice it looks rather blank! All you have to do to fix this is press the little button that says, “Retrieve Shown Movies” and you will be looking at our wide and wonderful selection of movies!

Great! Now that you can see the collection of movies that you can select from, you need to make your choice on which to watch. Whether you are stuck between two movies or just need to plan around events, you will want to know what times these movies are showing! That’s easy to do. Simply click on the movie of your choice and then press the “Find Showtimes” button at the bottom left of the GUI!

Finally, it’s time to check out those movie times! The available times are easy to view on the right hand side of the GUI application. If you are not satisfied with the times for a particular movie, simply double click another movie to see its showtimes. When you are done, press “Exit” on the bottom right of the screen to exit our application. We look forward to seeing you at Madison Square 12!
